WORK EXPERIENCE

Software Developer

MITR Learning and Media

06/2018 - Present

Sakinaka, Mumbai

- As a developer at MITR I was a part of multiple projects ranging from work in Vanilla JS to latest frontend and backend frameworks. These projects can be grouped into two broad domains.
- Curriculum Associates - Lesson Editor (VueJS, JavaScript (ES7), Docker, GraphQL, MySQL, php):**
- As an offshore team lead of 4 people, my job is to build new features, address bugs and issues.
- Support the team members and help them out in completing their tasks.
- Attend daily scrum and provide updates to the rest of the team.
- Vanilla JS and Node (JavaScript, React, jQuery, Canvas, HTML, CSS, Node):** These projects included building tools in Node and creating interactive E-Learning materials using javascript and canvas. I got a chance to work on many such projects from companies such as Philips, IKEA, Chevron, Korn Ferry etc.

Project Trainee

Reliance Industries Limited

06/2017 - 07/2017

Ghansoli, Mumbai

- Researched blockchain technology and how it can be implemented in the cybersecurity domain.
- Part of the team that was implementing Mokescreen as a deception technology to prevent data theft.

Project Trainee

Datamatics Global Services Limited

06/2016 - 07/2016

Andheri, Mumbai

- As a project trainee in Strategic Solutions Group, my responsibilities included researching ways Datamatics could integrate itself into the BPM landscape in India.

PERSONAL PROJECTS

JIRA Active Tickets Helper

Build this chrome extension to assist my team members in getting greater insight into the JIRA tickets they are currently working on. It's currently published and people can find it in the chrome extension store.
